

## **Penske PS-8760-DRAG-AIR Shock Absorbers**

**31 August 2011**

All Pro Stock competitors are to be advised that Penske Shocks have applied to ANDRA to have their pneumatic shock absorber (PS-8760-DRAG-AIR) recognised as complying with ANDRA Rules for use in Australian Pro Stock competition.

Penske have provided ANDRA Technical with fully detailed documentation to support their request and after consideration of the documentation and inspection of the shocks fitted to a vehicle it is deemed that the shock absorbers meet the rule requirements as detailed in the 2010/2011 ANDRA Rulebook on page 107. Competitors are reminded that the use of this pneumatic shock absorber must be in combination with all existing rules as stated in the rulebook and must not have any electrical connections of any kind.

In the event of a catastrophic failure of the shock absorber, a mechanical internal stop is designed to keep the compressed length of the damper at a safe value to prevent tyre contact in the wheel well or bottoming-out of the vehicle on the ground. Competitors are advised to make sure that these safety factors are maintained when installing and using these or any other shock absorber.

If further clarification is required please contact ANDRA Technical Manager at
