

## Technical Inspection Requirements

All competitors are to follow the procedure detailed in the current ANDRA rulebook under 4.9.10 on page 155. Failure to follow the procedure may result in delays in receiving and processing of applications.

It will no longer be acceptable to complete a statutory declaration at the track. It is the sole responsibility of every competitor to make sure they have their required licences and inspections prior to the event.

**ANDRA requires a minimum of 21 days for processing** of applications for licencing, technical inspections, and Log Book issuing. Failure of the competitor to allow sufficient time for processing by ANDRA Head Office will not be acceptable.

**Competitors presenting for racing at a track without the required licence, log book or technical inspection sticker will not be allowed to race.**

### 4.9.10 Technical Inspections

Technical Inspections must be carried out prior to application for, or renewal, of a Vehicle Log Book. The 'Office Copy' of a current and completed Technical Inspection form must be forwarded to Head Office when applying/renewing a Vehicles Log Book. Technical Inspection labels will be forwarded to vehicle owners only if these procedures have been followed. The following vehicles must undergo Technical Inspection every two years or on expiry of Vehicle Log Book.

- All dragsters / altereds / funny cars.
- All sedans quicker than 11.000 seconds (1/4 mile)/7.00 seconds (1/8 mile).
- All motorcycles quicker than 10.50 seconds (1/4 mile) or 6.70 (1/8 mile) other than road registered production motorcycles with unaltered swing arms slower than 9.99 seconds (1/4 mile) or 6.40 seconds (1/8 mile).
- All motorcycles with a modified swing arm, frame or brakes.
- All vehicles in the Exhibition category.
- Any other vehicle deemed necessary by ANDRA Officials or Event Scrutineers.

ANDRA Technical Inspections concentrate on construction and fixed safety related features of the vehicle not readily accessible during Event Scrutineering. Bell-housings and automatic transmission shields will be inspected off the vehicle. Evidence of Technical Inspection will be shown by the display of a current chassis/frame sticker on the vehicle, and the appropriate notation in the Vehicle Log Book. Inspections will be carried out by special arrangement, for which there may be a fee, by an accredited ANDRA Technical Inspector, or by contacting the relevant Division Director. All vehicles without a continuous Technical Inspection history must undergo inspection as a new vehicle. Failure to observe this rule is grounds for instant disqualification.

Chassis / Frame Inspection: Any vehicle where the frame or chassis undergoes major repairs or modification, or replacement, will see the onus for notification to officials on the Log Book holder. Failure to advise officials will be considered a false declaration.

NB: Information on the alignment of Technical Inspection and Log Book expiry dates may be found in section g) of 1.7 Vehicle Log Books (page 17).
