

Technical Bulletin Counterfeit SFI Labels on Suits and Hoods

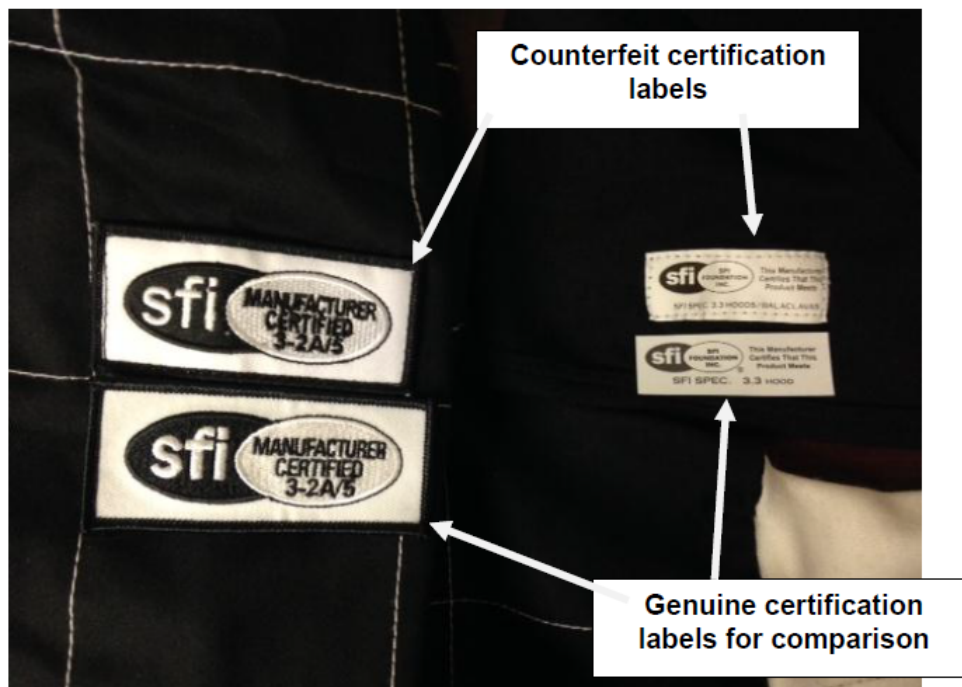

11 April 2014

Please note that SFI has found several products sold by Sawan Sports which bear counterfeit SFI labels stating that the manufacturer certifies that their products meet the applicable SFI Specs. SFI obtained examples of some of these products and determined through testing that they DO NOT meet the performance requirements of the SFI Specs: the Thermal Protection Performance of the suit falls short of the 3.2A/5 rating claimed on the counterfeit tag, and the thread holding the hood (balaclava) together is not heat-resistant.

These products have NOT been submitted for certification by the manufacturer and they do not comply with SFI Spec 3.2A for Driver Suits or SFI Spec 3.3 for Driver Accessories.

For full SFI release please see <http://www.sfi foundation.com/wp-content/pdfs/SFINotice04-08-14.pdf>

If further clarification is required please contact ANDRA Technical Officer on the details below
