

In the Hands of The Starter

The competitor has started the engine of the vehicle at the direction of The Starter and has moved the vehicle forward so the front wheel/s enter into (or are level with) the water box prior to the burnout box, therefore placing them in the hands of The Starter.

Lock-up Clutch

A clutch with a separate event or function, activated by mechanical, electronic or pneumatic means, that generates additional clamping force to the pressure plate. Progressive unlimited application of counterweights is not considered a separate event / function. Refer Definitions, "Clutch Lockup".

Mass Produced

A component of which at least 200 have been produced, and has been available generally. Onus of proof to the Classifier lies with the competitor. Where a conflict of opinion arises the ANDRA Board will determine the issue.

Mass Produced Factory

A vehicle, or component thereof, which was manufactured as part of general vehicle production or officially supplied or endorsed for sale to the general public by the vehicle manufacturer.

Methanol

Pure methyl alcohol produced by synthesis, used in Top Alcohol Dragsters and Top Alcohol Funny Cars to name a few.

Monocoque Construction

In relation to mass produced Unibody Sedans and their derivatives, means the floor pan of the vehicle from and including the front bulkhead / firewall to the rear most point of the boot floor, including the rear bulkhead, inner wheel wells (wheel-tubs), roof, pillars and suspension mountings.

Motorcycle

A vehicle, with two wheels that are in-line with each other, used to carry a person powered by an internal combustion engine or electric motor.

Muffler

An effective commercially manufactured exhaust noise limiting device using Australian Design Rule 83/00 as a guide.

Multi Stage Clutch

A clutch with separate and/or staged events / functions, activated by mechanical, electronic or pneumatic means during operation, providing varying clamping force to the pressure plate. Progressive, unlimited application of counterweights is not considered a separate event / function.

Nitromethane

Produced specifically as a fuel for Drag Racing, it is the result of a chemical reaction between nitric acid and propane.

Non-Tunnel Ram

An intake manifold, where the outer runners enter the plenum at the plenum's end.

OEM

"Original Equipment Manufacturer", a producer of mass produced vehicles available to the general public. Components accepted as OEM include those available from the manufacturer's suppliers, where they were originally fitted on the production line, or by a factory dealer or agent.
